schio	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	MPBTec
	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by	W
0876	multiplying the position with the distance from the basket	
LEMP BIG	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	,5£08914
90	Note:	
CSE089	* A subarray is a contiguous part of array.	ch'.c
	* Assume 1 based indexing.	28/00
25	* The array contains both negative and positive values.	
MPBTech	* Assume the player is standing on a cartesian plane.	08° [EM
